Relocation of Headquarters Telephone Cables: Production and Services Contracts Branch, OL, has received a priority request from the Office of Communications to contract for the relocation of telephone cables that presently run through the area where the new Headquarters Building will be located. It appears at this point, that the contract will be sole sourced to the Chesapeake and Potomac Telephone Company of Virginia (C&P), because they own the telphone cable and the junction boxes which by Federal Regulations gives C&P the option to perform this service. An initial fact finding session was held with C&P on 10 April and a number of issues were raised. follow-up session is being planned for the week of 16 April 1984.

Mural Upgrade at Headquarters Elevators: A Printing and Photography Division, OL, representative attended the 9 April meeting of the Fine Arts Commission. Of interest to Printing and Photography Division is a project to repair the large black and white murals located around the Headquarters elevator The Office of Current Production and Analytic Support has the original mural negatives in archival storage and will be tasking Printing and Photography Division to produce new, large, black and white prints. Since the original wall murals are about 20 years old, it will be an interesting challenge to match replacement panels.
